

► Mobile Road System

■ MRS Steel Road Plate

► Properties

The extremely versatile MRS steel road plate has numerous benefits for road works sites and access roads. The mobile steel plates protect the ground and are used with heavy equipment, for example tracked vehicles, to prevent localised soil compaction.

Material: steel plate

Sample size: 3500 x 2100 x 25 mm

Weight per plate: 1470 kg

Surface / colour: anti-slip surface on one side / customised paintwork

Load carrying capacity: approximately 200 tonnes (depending on ground condition)

Road transport: 16 units (24 tonnes)

Please note:
Lifting gear and load devices must only be used as intended by the manufacturers!
